**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Applicant invention is drawn to a media terminal adaptor apparatus and method for telephones, which generates and plays diagnostic messages indicative of a media terminal adaptor provisioning status. The media terminal adaptor detects errors in its provisioning status or an out-of-service state. When the telephone connected to the media terminal adaptor is taken off-hook and the media terminal adaptor that is not provisioned, improperly provisioned, or placed in an out-of-service state by the service provider, the media terminal adaptor will generate an appropriate diagnostic audio voice message or tone sequence to the telephone instructing the listener on how to proceed in order to resolve the problem. The audible message can consist of either a voice message stored in the audio message file or a sequence of audio tones stored in the tone sequence file or both. The voice message and/or audio tone sequence can be either canned (fixed, stored in local non-volatile memory) or dynamically generated.

Prior art of record failed to teach or fairly suggest in combination a media terminal adaptor apparatus and method in a communication network adapted to have a telephone connected thereto, said media terminal adaptor comprising: communication unit for connecting to a service provider provisioning server in a normal mode when the media terminal adaptor is in a provisioned state; *an audio message file for storing at least one of a fixed or dynamically generated diagnostic audio message and variable information (VI) for generating the dynamic*

*portion of the diagnostic audio message; provisioning failure detector for detecting when the media terminal adaptor has a non-provisioned status; and provisioning error message generator/player for generating and playing the diagnostic audio message through said telephone indicative of the detected non-provisioned status and providing corrective action to be taken by the user when an off-hook condition is detected when said telephone is taken off-hook.*

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
